 **vayyar™**
care

A virtual caregiver in every room

Older adults demand both constant protection and freedom from buttons and wearables.

They also want the dignity that goes hand-in-hand with privacy – nobody wants a camera in the bedroom or bathroom.

Our touchless technology is built around non-optical 4D imaging, providing 24/7 fall detection and unique visibility into activity.

Vayyar Care is radically different:

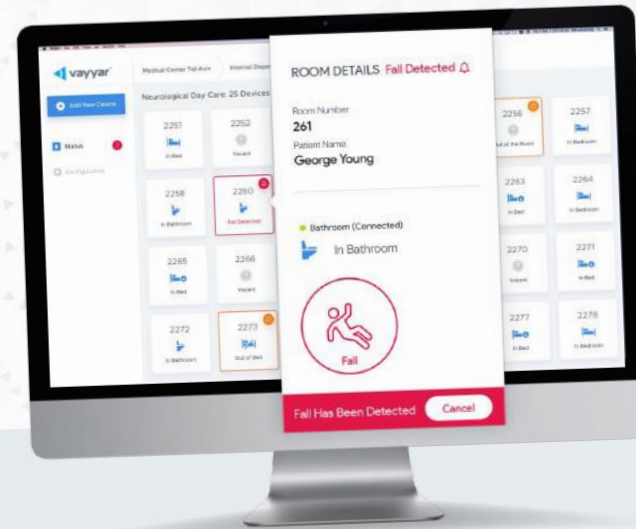

-  No intrusive cameras
-  No hard-to-reach buttons
-  No embarrassing wearables

Welcome to the Grayt Revolution.

Vayyar Care enables care providers to improve operations by:

- ▶ Ensuring rapid response to falls
- ▶ Supporting person-centered care
- ▶ Reducing staff workload

The key is rich, real-time data:

Instant fall detection

Eliminates long lies and identifies even minor "hidden" falls that often lead to more serious incidents.

Dynamic presence tracking

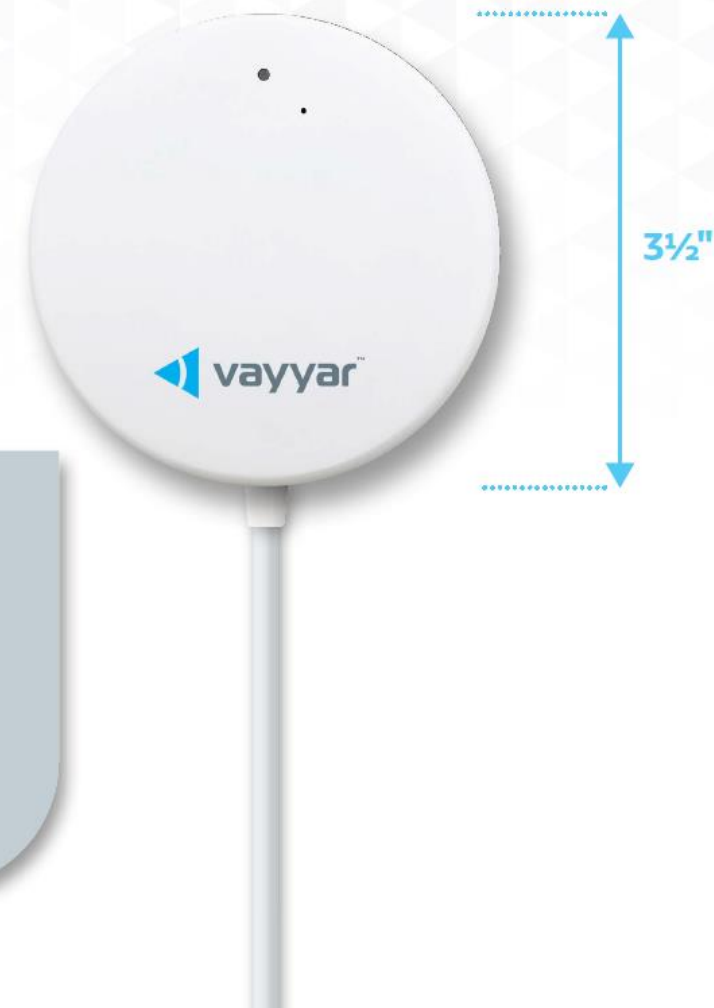

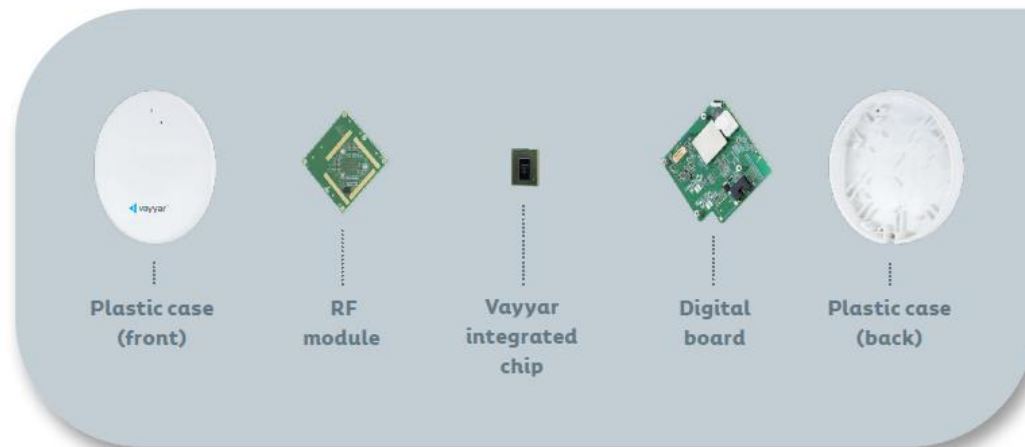

Caregivers get 24/7 visibility into time at rest, bathroom visits, and more.

Imminent bed exit alerts

Notifications when people sit up in bed allow caregivers to intervene before likely falls (coming soon).

The most advanced System-on-Chip for mmWave 4D imaging

- ▶ High resolution
- ▶ 140° field of view
- ▶ 169ft² coverage area
- ▶ Works in all lighting conditions
- ▶ Operates effectively in steam
- ▶ Flexible frequency bands (60-64 GHz)
- ▶ Small and flexible form factor
- ▶ Concealed installation

Enabling people to age with dignity

Vayyar Care detects falls and summons help. When people can't or won't ask for assistance, you can count on an alert that enables timely intervention.

Vayyar Care

Pendant and fall detection

Smart watch

Pull cord

Emergency call button

Works Autonomously

Reliably uncovers hidden falls and prevents long lies

Automatic Notification

Alerts for falls even when the person is unresponsive

Mains-powered

No need for user to charge device

Effortless upgrades

Automatic over-the-air new feature updates

Hassle-free

No device to wear

What our partners are saying:

"We wanted a solution that was unobtrusive and something that an elderly person wouldn't have to wear. Vayyar Care met all our requirements. It's very comprehensive and it's safe and easy to install. We believe we have an excellent solution."

Robert Colantuoni, President, WellAware Care

"Our goal is to leverage Vayyar Care as a 24/7 'caregiver that never sleeps' to reduce anxiety among caregivers so that they can focus on other things."

David Moss, President & CTO, People Power Company

"The technology is crucial because it allows the monitoring to happen, and the usability of a platform enables you to gain awareness of a senior's activity and then mitigate risk."

Andy Furlong, CEO, Tranquility Lifestyle Solutions

Our awards

FAQs

Q "Is there a pendant?"

A No, Vayyar Care is completely automatic, with nothing to wear.

Q "What needs to be done once it's set up?"

A Absolutely nothing! Our completely passive sensors work without the need for any additional steps.

Q "What if I already have a fall alarm or nurse system in place?"

A Our API integration allows Vayyar Care to work with all nurse call systems, and care platforms. Get in touch for more details.

Q "Is Vayyar Care safe?"

A The sensors use harmless RF waves significantly weaker than a Wi-Fi signal. They are completely safe and authorised for use across the US, UK, Europe, Canada, Australia, and Japan.
